

Caze Labs Job Openings

Sep 2024

CL2407JR v1.3

www.cazelabs.com

Introduction

- [Caze Labs](#) is a startup in Bangalore, India and it focuses on innovative products, solutions and services majorly in the areas of Cloud, Kubernetes, Artificial Intelligence, Cyber Security, Data Management and Open Source.
- Currently Caze Labs is looking for candidates suitable for products and custom solution development (in-house and for clients)
- Candidates looking to restart their careers also can apply.
- **Education:** A Bachelor's or Master's degree in Computer Science or a related technical discipline, or equivalent experience.
- **Work mode:** Hybrid/Remote
- **Location:** The base location will be Bangalore
- **Please apply:** <https://cazelabs.com/careers>

General Expectations for all the roles

- **Integrity and Value**
 - High level of integrity, value and respect
 - Non-hierarchical culture
 - Respect collaborative value
- **Communication**
 - Good Verbal and Written communication
 - The ability to articulate clearly
- **Teamwork and Collaboration**
 - Working with cross-functional teams
 - Goal-oriented work culture
 - Conflict Management and Flexibility
- **Time management and prioritization**
 - Good planning and focus on tasks based on priorities
 - Ability to manage self and team goals
- **Accountability and Ownership**
 - Work ownership and high level of accountability
 - Identification of risks & mitigation

[CL2407-DB01] Data Base - Solution Lead

Experience : 5-8 Years [No of positions : 1]

[CL2407-DB02] Data Base - Solution Architect

Experience : 12+ Years [No of positions : 1]

- Requirement Analysis, Design, Development and Debugging
 - Database Expertise: Strong understanding of one or more databases such as MySQL, Microsoft SQL, Oracle, or PostgreSQL.
 - Good understanding of Time Series DB.
 - Experience in solutions integrating Data Bases
 - Proficient in database optimization concepts, including sharding, partitioning, clustering, high availability, and replication.
 - Strong knowledge of database backup and recovery processes.
 - Skilled in database performance analysis and fine-tuning.
 - Database and Storage integrations and working experience
 - Technology integrations with DB (Cloud, Big Data or similar)
 - Aware of the latest tools, frameworks and trends
- + Architecture (Specific to the role) : Expertise building in architecture / design for complex solutions / products (storage related is a plus). Technical decision making and leadership

[CL2407-DP01] Data Protection - Solution Lead

Experience : 5-8 Years [No of positions : 2]

- Requirement Analysis, Design, Development and Debugging
- Experience in solutions integrating Data Protection solution
- Proficient in at least one backup/recovery software such as Veeam, Velero, SODA Kahu, Commvault, Veritas Netbackup, or Networker.
- Experience with Purpose Built Backup Appliances (PBBAs) such as Veritas Netbackup Appliance, Data Domain, Rubrik, or Cohesity.
- In-depth knowledge of storage protocols like Amazon S3 and their applicability to data protection.
- Knowledge of high availability and cross-data center replication at the application or storage level is a plus.
- Aware of the latest tools, frameworks and trends

[CL2407-TW01] Technical Writer (Storage)

Experience : 5-12 Years [No of positions : 1]

- Requirement Analysis, Architecture, Design, Development and Debugging
- Expertise in creating clear, concise, comprehensive and user-friendly documentation.
- Ability to review and proofread. Also, methods to ensure quality.
- Quick in technical understanding and ability to communicate with different users and content-providing teams (Key technical areas: Storage, Database, Cloud, Data Management, HPC, AI, Bigdata, Cyber Security)
- Ability to work with cross-functional teams to collect requirements, take feedback, and manage deliverables. Help other writers in creating documentation. Communicate complex ideas in a concise manner
- Familiarity with documentation tools and frameworks
- Product documentation, Open Source documentation etc can be a plus
- Aware of the latest tools, frameworks and trends
- Technical decision-making and leadership

[CL2407-DA01] Data Analytics - Solution Architect

Experience : 8-12 Years [No of positions : 1]

- Requirement Analysis, Architecture, Design, Development and Debugging
- Statistical methods, predictive modelling, and data mining techniques.
- Data Monitoring and Data Visualization (tools like Tableau, Power BI, or similar)
- Data Query, processing large data sets with high performance and scalability
- Expertise building data pipelines and end-to-end solutions with storage products.
- Experience in R, Python or similar
- Building insights from data and articulating for actions
- Technical decision-making and leadership

[CL2407-OS01] Open Source & Open Stack Solution Architect

Experience : 8-15 Years [No of positions : 1]

- Requirement Analysis, Architecture, Design, Development and Debugging
- Strong expertise in Python, Go, and Shell scripting.
- Experience with unit testing frameworks such as pytest.
- Proficient with components like Manila, Cinder, Nova, and Neutron.
- Hands-on experience with virtualization technologies such as KVM and Xen.
- Extensive experience in Ansible module development.
- Proficient with DevOps practices and tools like Jenkins, Git, and Gerrit for continuous integration and continuous deployment.
- Active contributors to open-source communities will be highly regarded.
- Strong understanding of RESTful API design and microservices architecture.

[CL2407-CS01] Cyber Security Solution Architect

Experience: 8-15 Years [No of positions : 1]

- Requirement Analysis, Architecture, Design, Development and Debugging
- Proficient with tools such as Splunk, MS Sentinel, SentinelOne, QRadar, or similar products for log analysis.
- Expertise in SIEM/SOAR, Hands-on experience in administering or setting up threat hunting on EDR, XDR and SIEM tools.
- Skilled in analyzing endpoint, network, and application logs to identify potential security threats.
- Expertise in Python, Go, and Shell scripting.
- Knowledgeable in writing security threat response automation workflows.
- Expertise in building architecture/design for complex solutions/products (storage-related is a plus).
- Technical decision-making and leadership

[CL2407-AI01] AI Solution Architect

Experience: 8-15 Years [No of positions : 2]

- Requirement Analysis, Architecture, Design, Development and Debugging
- A proven track record of designing and implementing successful AI solutions.
- Deep understanding of machine learning algorithms and techniques, including supervised, unsupervised, and reinforcement learning.
- Extensive experience with deep learning frameworks, such as TensorFlow and PyTorch, including model training, optimization, and deployment.
- Proficiency in Python, with a strong background in developing AI solutions, including data preprocessing, model development, and integration with applications.
- Comprehensive knowledge of DevOps and MLOps practices and tools, including continuous integration, continuous deployment, and automation frameworks to streamline AI workflows and ensure efficient model management.
- Experience in LLM/GPT

[CL2407-TE01] Technical Marketing Engineer - Senior

Experience: 12+ Years [No of positions : 1]

A bachelor's degree in engineering or a related technical field

Plus : Master's degree in engineering or business (MBA)

1. Should possess a strong technical knowledge

- Technology expertise : Storage, Cloud, AI, Cyber Security, Big Data
- AI : Strong expertise with AI solutions and technology(including GenAI)
- Engineering : In depth understanding of the engineering process and products (learnability to expertise faster)
- Product Development : End to end product development experience
- Technical Articulation : Ability to provide clear communication
- Technical Content : Ability to provide professional technical content for solutions/ product use cases

2. Research and Analysis:

- Technology and industry analysis (Research reports, surveys, product landscape, reference solutions etc)
- Ability to derive future looking inputs from the analysis
- Competitors and product capability analysis
- Provide gap analysis and strategy inputs

3. Marketing Skills:

- Market analysis and segmentation
- Product positioning and value analysis
- Customer analysis and impact insights
- Use cases and potential analysis to give strategy inputs

4. Collaboration

- Strong collaboration skills and industry connects
- Alliance and association with open source, technology and industry organizations
- Ability to organize technology events and build communities
- Strong customer engagement capabilities and value building

5. Demonstrations and Illustrations

- Ability to build solution demos for different use cases (AI and Storage products)
- Bring illustrative technical value through performance, capability and quality of solutions for customers

[CL2407-CN01] Cloud Native Developer

Experience: 2-5 Years [No of positions : 1]

- Development and Debugging Skills
- Proficiency in programming (Golang)
- Experience in Kubernetes (Install, configure, and maintain Kubernetes clusters, Orchestrating applications, Development of features/apis)
- Working experience with Cloud platforms (AWS/Azure/GCP/Similar) – Application deployments, services and integrations
- Knowledge of REST APIs and integrations
- Open Source working is a plus

[CL2407-AI01] Big Data Solution Architect

Experience: 8-15 Years [No of positions : 1]

- Requirement Analysis, Architecture, Design, Development and Debugging
- A proven track record of designing and implementing successful Big Data solutions.
- Deep understanding of Big Data Technology Landscape and ecosystem
- Expertise in HDFS, MapReduce, YARN, Spark, Flink, Kafka, NiFi, Airflow, Sqoop, Flume, ETL Tools
- Performance tuning and benchmarking of data pipelines
- Working experience in Big Data solutions with different storage backends and optimization
- Good knowledge in Data Base and Storage Systems
- Experience in Open Source Big Data working is a plus

Looking forward to work with you!

Thank You!
